

Databricks Data Platform Assessment

Understand your platform.
Identify risks. Define the path
forward.

ADVANTAGES OF OUR APPROACH

FULL PLATFORM VISIBILITY

- ✓ Gain a complete view of your environment across compute, governance, workloads, and operations.

OBJECTIVE MATURITY SCORING

- ✓ Evaluate your platform using a consistent scoring model across key dimensions for objective benchmarking and comparison.

AUTOMATED RISK DETECTION

- ✓ Identify misconfigurations, anti-patterns, and hidden operational risks early to ensure system stability and resilience.

GOVERNANCE & SECURITY CLARITY

- ✓ Understand access models, Unity Catalog usage, and compliance gaps across environments and governance layers.

OPERATIONAL EFFICIENCY INSIGHTS

- ✓ Detect inefficiencies across clusters, jobs, and pipelines that impact cost and performance outcomes.

ACTIONABLE ROADMAP

- ✓ Translate findings into prioritized actions aligned with business and technical impact for faster remediation and optimization.

CORE BENEFITS YOU GET

Full platform visibility
in days, not weeks

Clear prioritization of
critical risks and gaps

Improved governance
and security posture

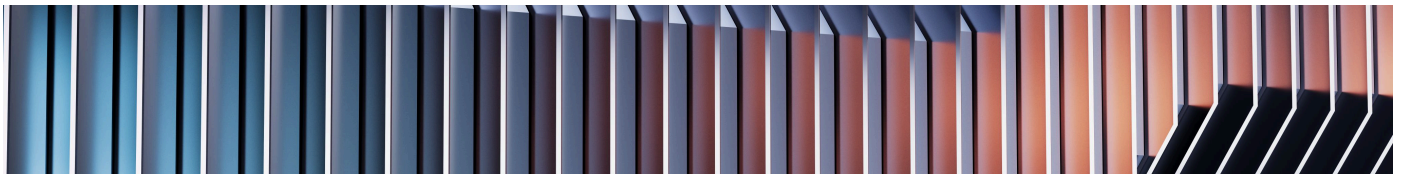

Up to 90% automated
platform assessment

Reduced platform
inefficiencies and cost
drivers

Structured roadmap
for platform maturity

EXPECTED OUTCOMES

 **Automated Environment Discovery.** We collect metadata across users, clusters, jobs, pipelines, and catalogs using Databricks APIs,

 **Scoring & Maturity Evaluation.** We apply a consistent scoring model across platform dimensions, providing a clear understanding of your current maturity and areas for improvement.

 **Risk & Gap Identification.** We detect misconfigurations, anti-patterns, and governance gaps, classifying them by severity and business impact.

 **Prioritized Roadmap Creation.** We translate findings into a structured remediation plan, aligned with critical, high, and medium-term priorities.

 **Executive & Technical Readout.** We deliver clear, multi-format outputs, including executive summaries, detailed reports, and actionable scorecards.

PRELIMINARY TIMELINE

POWERED BY DATABRICKS PRACTICE AT SOFTSERVE

75%

Databricks Certified Professionals

370%

Experts with Databricks Experience

40

Databricks Projects Delivered in the last three years

15

Cloud Data Migration Projects Delivered at Scale
